REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claim 1

Claim 1 recites an apparatus connecting buyers and sellers of products services comprising: *inter alia* assigning means denoting a weighted importance to provider characteristics associated with each subscribing buyer and seller using object affiliations to indicate a level of presence each object is given in the directory, wherein the level of presence is based upon company profile, search result positioning and access to Requests for Proposals to afford each subscribing buyer and seller to be listed in multiple brands.

The most closely applicable prior art of record is referred to the Office Action mailed on March 27, 2006 as U.S. Patent No. 6,968,513 to Rinebold et al. which discloses an online interactive system comprising a business referral and income generation system linked to one or more listed web sites of businesses in particular locality or geographical area. The system enables quicker and substantially automated and on-line self-posting, design, selection, updating and payment for listings, ads and coupons. (Abstract) However, Rinebold neither anticipates or fairly and reasonable teaches an apparatus connecting buyers and sellers of products services comprising: *inter alia* assigning means denoting a weighted importance to provider characteristics associated with each subscribing buyer and seller using object affiliations to indicate a level of presence each object is given in the directory, wherein the level of presence is

based upon company profile, search result positioning and access to Requests for Proposals to afford each subscribing buyer and seller to be listed in multiple brands .

Newly cited reference World Publication No. WO 94/233383 to Lalonde discloses an interactive computing system for facilitating sales of goods and services and for gathering information, which provides a facility for presenting the interests of the users of the systems so as to automatically direct information to recipients who are likely to be interested in the information (page 2, lines 15-20). The system provides electronic agents which include information regarding the expressed interests, purchase histories, and demographic characteristics of the user (abstract). Lalonde neither anticipates or fairly and reasonably teaches an apparatus connecting buyers and sellers of products services comprising: *inter alia* assigning means denoting a weighted importance to provider characteristics associated with each subscribing buyer and seller using object affiliations to indicate a level of presence each object is given in the directory, wherein the level of presence is based upon company profile, search result positioning and access to Requests for Proposals to afford each subscribing buyer and seller to be listed in multiple brands .

Newly cited article "About.com Adds Auction-Based Advertising to Platform" teaches an online and purchasing system which allows buyers to create contextual text-link advertisements for placement within highly relevant locations on specific About.com sites. The article further teaches a sponsored contextual listings called Sprinks TM, which is an online purchasing system that is an auction environment where dynamic price competition establishes optimum placement for the buyer while

About.com receives maximum payment. Sprinks allows advertisers to name their price for specific link locations on high quality, highly targeted sites. Sprinks gives advertisers access to About.com's interested audiences and gives users the ability to connect with merchants that best server their needs. (Whole article) The article neither anticipates or fairly and reasonable teaches an apparatus connecting buyers and sellers of products services comprising: inter alia assigning means denoting a weighted importance to provider characteristics associated with each subscribing buyer and seller using object affiliations to indicate a level of presence each object is given in the directory, wherein the level of presence is based upon company profile, search result positioning and access to Requests for Proposals to afford each subscribing buyer and seller to be listed in multiple brands.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
